

# Tengizchevroil Fact Sheet

1H 2016

## History and Ownership

- Tengiz, the world's deepest producing super giant oil field, was discovered in 1979.
- The Tengizchevroil (TCO) partnership was formed on April 6, 1993, between the Republic of Kazakhstan and Chevron.
- Current partners are Chevron, 50 percent; KazMunaiGas, 20 percent; ExxonMobil Kazakhstan Ventures Inc., 25 percent; LukArco B.V., 5 percent.

## Production and Reserves

- Estimated oil in place in the Tengiz field is 3.2 billion metric tonnes (25.5 billion barrels) with 200 million metric tonnes (1.6 billion barrels) in the Korolev field.
- Total recoverable crude oil in the Tengiz and Korolev fields is estimated to be 800 million to 1.3 billion metric tonnes (6.4 to 10.7 billion barrels).
- The areal extent of the Tengiz reservoir is large, measuring 20 kilometers (12 miles) by 21 kilometers (13 miles).
- TCO completed its Sour Gas Injection and Second Generation Plant expansion project in 2008, which brought daily production capacity to approximately 75,000 metric tonnes (600,000 barrels) of crude oil and 22 million cubic meters (750 mscf) of natural gas.
- Crude production for 1H 2016 was 14.4 million metric tonnes (114.8 million barrels).

## Health, Safety and the Environment

- Since 2000 TCO has invested \$3 billion since the year 2000 on projects to minimize environmental impact.
- TCO's current gas utilization rate is over 97 percent.
- Investments in equipment reliability have reduced the number of technical malfunctions at the plants and the volume of unplanned sour and acid gas flaring during technical malfunctions by 98 percent since 2000.
- Total air emissions generated per tonne of oil produced have been reduced by 72 percent since 2000, even as annual crude oil production has grown by 2.5 times as a result of TCO's investments in capital programs and equipment reliability.

## Product Sales

- In 1H 2016, TCO sold 673 thousand metric tonnes of LPG, 3.67 billion cubic meters of dry gas and 1.12 million tonnes of sulfur.

## Benefits to Kazakhstan

- From 1993 through 1H 2016, TCO made direct financial payments of \$114 billion to Kazakhstani entities, including Kazakhstani employees' salaries, purchases of Kazakhstani goods and services, tariffs and fees paid to state-owned companies, profit distributions to Kazakhstani shareholder and taxes and royalties paid to the government.
- In 1H 2016, direct payments to the Republic of Kazakhstan totaled \$2.6 billion. In 2015 direct payments to the Republic of Kazakhstan totaled \$8.2 billion.
- TCO has spent over \$800 million on Kazakhstani goods and services in 1H 2016, including over \$200 million for FGP-WPMP.
- TCO has invested more than \$21 billion on Kazakhstani goods and services since 1993.

1H 2016

## Workforce Development

- Kazakhstani citizens hold 86 percent of TCO positions, compared to 50 percent in 1993.
- Kazakhstani managers and supervisors represent 74 percent of the TCO managerial workforce. Ongoing training and development programs exist to support the advancement of employees to positions of increasing responsibility

## Community Outreach

- Since 1993, TCO has invested over \$1.2 billion to fund social projects and programs in the Atyrau Oblast for the community and employees.
- In 2016, TCO has budgeted \$25 million for Egilik social infrastructure program, the majority of which will be spent for construction of kindergartens, schools and other social facilities in Atyrau Oblast.
- In 2016, TCO's Community Investment Program has about \$1 million in projects planned to help improve the quality of health, education and training in Atyrau Oblast.

## Future Growth Project- Wellhead Pressure Management Project

- In July 2016, TCO Partners announced approval for the final investment decision of the Future growth Project-Wellhead Pressure Management Project (FGP-WPMP), the next major expansion of the Tengiz oil field.
- The FGP-WPMP are being constructed simultaneously to realize significant efficiencies and cost savings.
  - Based on TCO's highly-successful Sour Gas Injection-Second Generation Project (SGI-SGP) expansion project, FGP will expand production by approximately 12 million tonnes per year/260,000 barrels per day to about 39 million tonnes per year/850,000 barrels per day, with peak rates exceeding 900,000 barrels of crude oil per day.
  - WPMP will keep the existing Tengiz plants full by lowering the flowing wellhead pressures and boosting the pressure to the six existing processing trains.
- The main FGP-WPMP equipment will be fabricated in Kazakhstan, South Korea and Italy and pre-assembled into modules for transportation to Tengiz and final assembly.
- FGP-WPMP has completed front-end engineering and design (FEED) and about 54 percent of detailed engineering; and is currently engaged in long-lead procurement and early construction works for key project infrastructure at site in Tengiz.
- FGP-WPMP will generate significant economic benefits for Kazakhstan including the creation of about 20,000 jobs at peak construction.
- TCO has engaged Kazakhstani entities to participate in FGP in engineering, procurement and fabrication services and has pre-screened over 1,500 Kazakhstani companies to date and 752 Kazakhstani companies pre-qualified.
- FGP-WPMP will develop new opportunities for businesses and people in Kazakhstan – high tech equipment servicing, module fabrication capabilities and training.
